

Mechanical Pre-Cagging Rebar Coupler

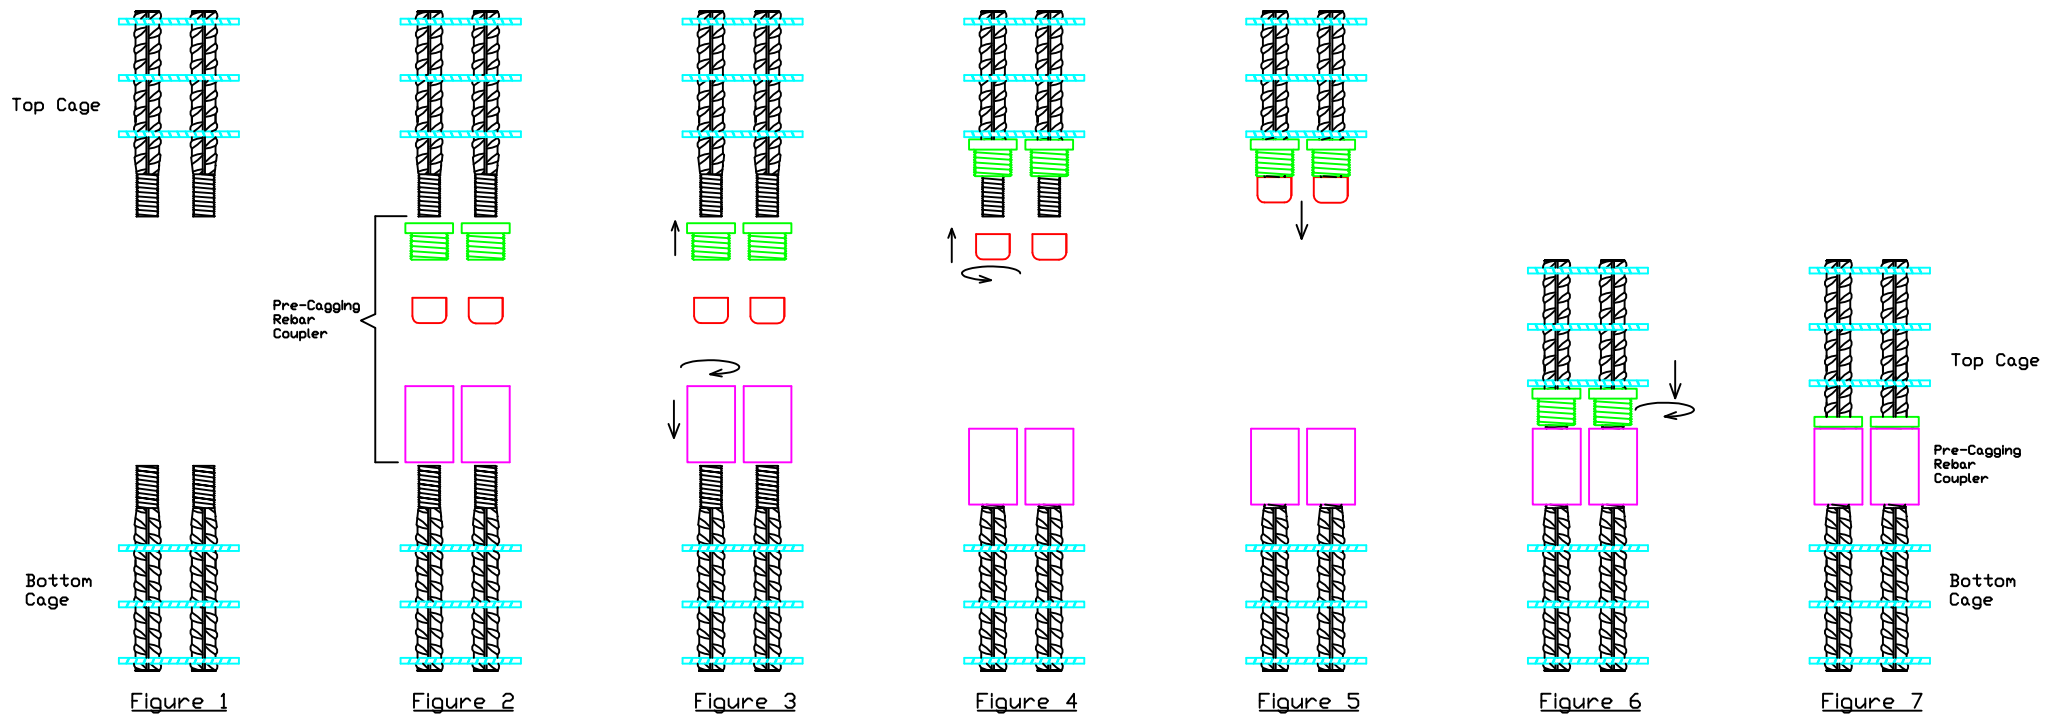

Figure 1 : The Pre-Cagging main bar with thread.
(The main bar was welded and can't rotated)

Figure 2 : The **Pre-Cagging Rebar Coupler set**.

Figure 3 : Rotated the **Main Coupler** onto the thread of the bottom cage and position the **Locknut** onto the top cage.

Figure 4 : Rotated the **Internal Coupler** onto the thread of the top cage.

Figure 5 : Move the top cage down and slot the **Internal Coupler** into the **Main Coupler** at the bottom cage.

Figure 6 : Rotated the **Locknut** unit against the **Internal Coupler**.

Figure 7 : **Pre-Cagging Rebar coupler** to join the two cage together.
